

Types of Judgements

```
graph TD; A[Types of Judgements] --> B[Factual]; A --> C[Moral]; A --> D[Normative]; B --> E["p is the case<br/>is p the case?"]; C --> F["p is morally right or wrong<br/>based on principles or context"]; D --> G["p ought to be the case<br/>regardless of whether it is the case"];
```

Factual

p **is** the case
is p the case?

Moral

p **is** morally right or wrong
based on *principles or context*

Normative

p **ought** to be the case
regardless of *whether it is the case*
